Office of the
Director General (Commercial)
G-39, WAPDA House Lahore

No. 2372-79 DG(C)/Tariffs/T-8

Dated: 11-12-2007

Chief Executive Officers,
All DISCOs. (BY Name)
(except QESCO)(Lesco) Lahore.

Subject: **CONSUMPTION OF AGRICULTURAL TUBE-WELLS DURING
PEAK HOURS.**

Relief in off-peak hours at the rate of Ps 75/KWH for the energy consumption recorded during 2200 hrs to 0600 hrs on the Time of Day meters at private agricultural consumers of Punjab, Sind & NWFP Provinces was allowed vide letter No.498-528/GMCS/Tariffs/T-150 dated 08-08-2005. After analyzing the company wise data from 07-2007 to 10-2007 (copy enclosed) it has been observed that there is still higher electricity consumption during peak hours as compared to off-peak hours. It may be reiterated that we have to manage the consumption during peak hours that's why low tariff has been approved during off-peak hours. Evidently there has not brought about the desired results for load management because the agricultural consumers are not properly aware of the associated pecuniary benefits of TOD tariff due to using the consumption during peak hours as compared to Off-peak hours.

It is therefore requested to offer your immediate comments regarding less use of consumption by the agricultural consumers during Off-peak hours. Moreover wide range publicity may also be arranged to create awareness among the consumers to motivate them to use the electricity consumption during Off-peak hours being economical for them to curtail peak demand and thereby achieving a more even distribution of load throughout 24 hours for efficient running of the system.
